Craig McClain

“Craig McClain became the fifth Executive Director of Louisiana Universities Marine Consortium on July 1, 2016. Regarded as a nationally recognized marine biologist/ecologist, McClain brings more than 20 years of experience in oceanographic research and has published more than 50 articles which have greatly contributed to this field of study. McClain’s research primarily centers on marine systems, and particularly the biology of body size, biodiversity, and energy flow focusing often on the deep sea. He has conducted numerous experiments and studies in some of the most remote regions of the world.

McClain believes in the power of scientific communication. He

serves as a social media trainer and a consultant for scientists, providing insight on best practices to effectively engage the public with scientific information.

McClain is also the founder and chief editor of Deep-Sea News (DSN), a top-rated ocean themed blog and social media network which has been featured in both local and national media outlets including Science Illustrated, Charlotte Observer, MSNBC, Fox News, Discovery Channel, and National Geographic. McClain has served as a consultant to ABC News, Wired, Talk Nation Radio, Forbes, and National Public Radio. His work has also appeared in the Columbia Journalism Review.

He is no stranger to Louisiana

or LUMCON, as his career as a marine biologist began during his undergraduate participation in a LUMCON summer course.

The LUMCON W. J. DeFelice Marine Center is located in Cocodrie, La., approximately 85 miles southwest of New Orleans. It is situated in the heart of the estuarine wetland complex of the Mississippi River deltaic plain, between two active distributaries – the Atchafalaya River and the Mississippi itself. This site provides ready field access to the most productive estuaries in the United States, including:

- Vast salt, brackish and freshwater marshes
- barrier islands, and
- offshore environments of the northern Gulf of Mexico

The Marine Center is a modern, 75,000 square foot complex of research, instructional, housing, and support facilities completed in 1986. The Center includes 26,000 net usable square feet of laboratory, class-

room, office, and library space. Eight laboratories are equipped with running sea water. Six additional laboratories are reserved for dry applications and instrumentation and are used for both research and teaching. Dormitory rooms and five apartments provide housing for up to 80 persons and are available for use by students, visiting investigators, and instructors. A cafeteria/ general meeting room is situated in the center of the complex, linking the housing and research/ instructional spaces. A 99-seat auditorium facilitates teaching activities, presentation of seminars, and the convening of conferences.” (www.lumcon.edu)
