From the meeting of June 13th:

Dr. John Green

John Harvey Green was born to Harvey Green of Canada and Katherine Sandry of Minnesota. During WWI, he lived in Louisville, KY. After the war his family moved to Hamburg, NY, later returning to Louisville. He attended St. Xavier High School where he participated in football, track and cross country events. On September 7, 1954 while attending the first day of that school year he felt ill. He was admitted to the hospital and was diagnosed with POLIO. Dr. Green recalls there was a

great epidemic of polio in the Great Lakes Regions in that time frame. He attributes his exposure to the virus from a summer swim in Lake Erie when visiting his grandmother. In 1955, only one year later, the Polio Vaccine was developed. In 1958 he graduated from St. Xavier and then started studies at the University of Louisville where he graduated with a BS degree in biology in 1962. He received a MS in Botany in 1964 and a PHD in 1969. Dr. Green discussed the

trials and tribulations of living with Polio. He has spent many hours in physical therapy trying to counteract the physical debilitation of polio. Dr. Green never hid his disability. He feels he was always very honest with his employer and others about having polio. John was employed at Nicholls State University in the fall of 1969. He retired in 2005. While there he was a professor of Biological Sciences and taught classes each year in addition to serving in several administrative positions including Department Head, Assistant to the Dean, as well as Dean of the College of Arts and Sciences. He also served as the Director of the Marine Laboratory at Fourchon (now part of LUMCON). Dr. Green is also one of the founders of the LA Universities Marine Consortium (LUMCON).

He is most thankful for NSU and the people of Thibodaux who saw beyond the disability. Thibodaux welcomed him and made him feel very comfortable. Dr. Green thanked the Rotary group for their continued

efforts to eradicate polio.
